

Systematically cleaner pool water – precisely our strength!

DULCODOS® Pool, the compact system for metering, measuring and control of pH and chlorine in private swimming pools

Carefree movement through the water is one of life's pure pleasures! So it's high time for 100% risk-free pool enjoyment free from chlorine odours and red eyes. This is where ProMaqua offers just the right solution, because the best swimming pool water demands the best treatment performance and this is just what we promise you, guaranteed.

Application:

DULCODOS®Pool metering, measuring and control unit is a ready assembled compact system for water treatment in private swimming pools. Control is based on the measured pH value and chlorine content.

Advantages:

- Safety and reliability thanks to connection-ready assembly
- Trouble-free thanks to exact metering using hose pumps
- Simple operation
- In-house manufacturing means optimum quality

The system comprises:

- Sensors
- Controllers
- Hose pumps
- pH value and redox value sensors
- Two-channel controller D2C
- In-line probe housing with metering water filter and metering water monitoring
- Extensive accessories

Technical data:

Type:	DULCODOS®pool DSPa PRO	Connector point of injection:	Injection valve with 1/2" screw thread
Capacity:	max. 2.4 l/h	Connector sample water:	8 x 5 mm
Counter pressure:	max. 1.5 bar	Dimensions (WxHxD):	595 x 745 x 150 mm
Power supply:	230 V, 1~, 50/60 Hz	Weight approx.:	10 kg bzw. 6 kg (without pumps)
Connected load:	approx. 0.1 kW
