

Hydraulic diaphragm metering pump ORLITA Evolution mikro

For the smallest dosing quantities at high pressures

Safety in operation

Protection against contamination of the process fluid thanks to diaphragm rupture indicator

Almost maintenance-free

Thanks to fewer mechanical functional elements

High flexibility

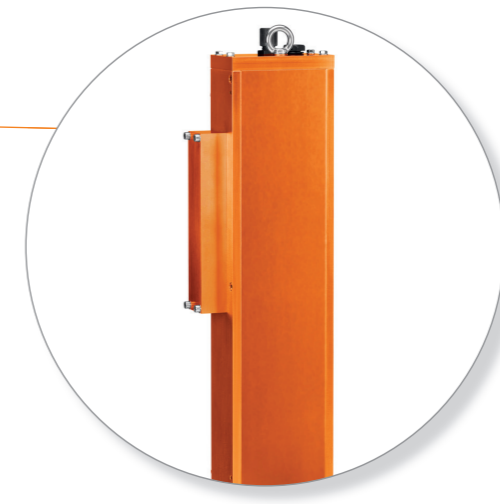

Control range of 1:200

High quality

Construction and design according to API 675
ATEX approval for Zone 1 and 2

Space saving design

Thanks to the use of linear motor technology

Capacity range

Between 0.01 l/h at 260 bar and 18 l/h at 10 bar
